The list of facilities below compiles OSHA's May 2013 Clean Air Act (CAA) Watch List. EPA maintains a “Watch List” to facilitate dialogue between EPA, state and local agencies on enforcement matters relating to facilities that have received identified violations. Basic fact: none of the facilities on the Watch List has actually violated the law on which an evaluation or investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. The Watch List does not identify which alleged violations of environmental laws may pose the greatest risk to public health or the environment. It is an automated report based on data from the Air Facility System (AFS), which is used by federal, state and local agencies to track environmental enforcement information. Facilities appearing on the Watch List may be identified as high priority violations (HPVs). Some facilities may appear on the Watch List due to data errors, which are typically identified and addressed during the EPA-state-local dialogue. EPA expects the government agency with jurisdiction over a facility with an HPV to initiate an appropriate enforcement response, in a timely manner, and input the action into AFS. Some facilities on the list are the subject of existing orders, are actively participating in negotiations, or are the subject of an investigation. While progress is being made toward resolving violations, further activities may be required to achieve compliance. This list reflects updates from previous Watch Lists due to changes in the enforcement case status (e.g., HPVs addressed or resolved), data corrections made to AFS, or new facilities added. The dynamic nature of the Watch List is a result of its use as a management tool to oversee adherence by EPA, state, and local agencies to enforcement response policies. For detailed information, please see the Watch List Fact Sheet (www.epa-echo.gov/echo/docs/watch_list_fact_sheet.pdf).
