

Ecology currently identifies the following five facilities as majors in WPLCS and would like EPA to identify them as majors in PCS.

ID Number	Facility Name	Street Address	City Name	Facility Type

WA0037214	TACOMA NORTH NO 3	OUTFAL	TACOMA	MUNICIPAL

Ecology would like EPA to remove the following majors from their list. CDC Mead is no longer a functioning smelter and as it exists, does not deserve the major designation. Chinook Ventures now operates a facility at the old Longview Aluminum facility. The activities also no longer deserve status as a major.

ID Number	Facility Name	Street Address	City Name	Facility Type

WA0000086	LONGVIEW	4029 INDUSTRIAL WAYCOLUMBIA RIVER	LONGVIEW	INDUSTRIAL

The permit below is listed as a major in WPLCS but is not included as a major or as a minor in EPA's lists from the state framework website. It is not an operational smelter and should not be a major. But the permit is still active so I don't know why it is not on one of EPA's lists. Ecology would like EPA to identify this permit as a minor in PCS.

ID Number	Facility Name	Street Address	City Name	Facility Type
WA0000540	COLUMBIA GORGE ALUMINUM	IN WPLCS NOT IN EITHER EPA LIST but inactive since plant closed down but discharges stormwater		

When pulling data from the state framework review site it includes the following federal facilities even when I pulled state only facilities and one cancelled WA state permit. Why are cancelled permits included?
